Survey

Transfeminine Experiences and Interactional Styles

Conversation Partner (Cisgender)

This survey will ask you questions about your identity, experiences, and background. Information you provide here will help me to consider a broader picture of you as I analyze your linguistic behavior. If you have any questions for me, feel free to ask at any point. **All questions are optional**, and you are encouraged to skip any questions which may make you feel uncomfortable, and to answer in a level of detail most comfortable for you. Additionally, keep in mind the risk of identification associated with sharing recognizable information, especially that which may be unique to you.

One- or two-word answers are sufficient for these questions.

For all questions, if none of the options provided fit you, you are encouraged to write something else, choose not to answer, or indicate that you would like to elaborate in our recorded conversation by writing "elaborate".

Commented [1]: It will be MUCH easier and faster to make most of these multiple-choice questions (with a line to write in a different answer where appropriate, such as with gender or sexuality labels). Open-ended questions are better asked in the interview, otherwise the survey will take up too much of your study time
